

Yukon Employment Outlook Report

Occupations were included in this report based upon a analysis of administrative data (employment insurance), together with a qualitative analysis of labour market events and occupational research.

Each occupational narrative includes the following:

- COVID-19 observation,
- Employment Insurance claims information,
- Main industry identification,
- Regional industry employment comment, and
- Qualitative remark.

Given the changing nature of the economy and labour market, these outlooks/trends are not long-term.
